

Irrigreen2[®] App Guide

IOS

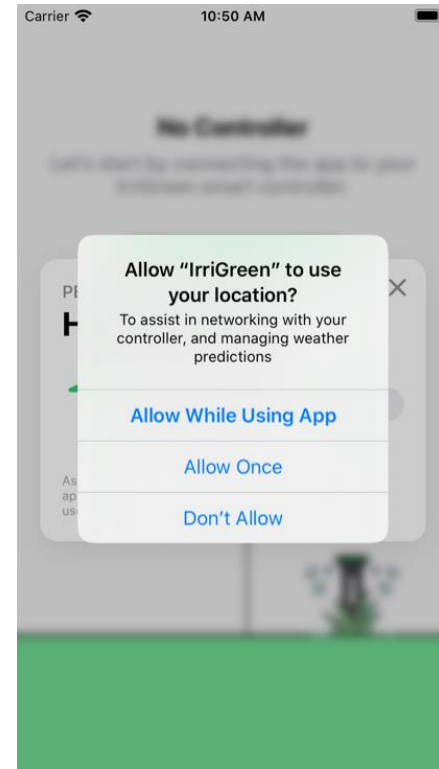

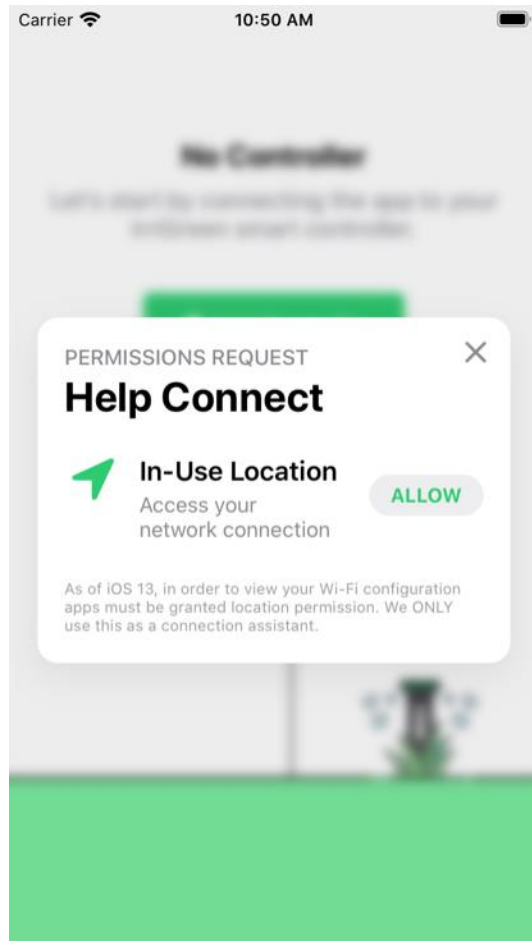

One Head per Zone. Simple.

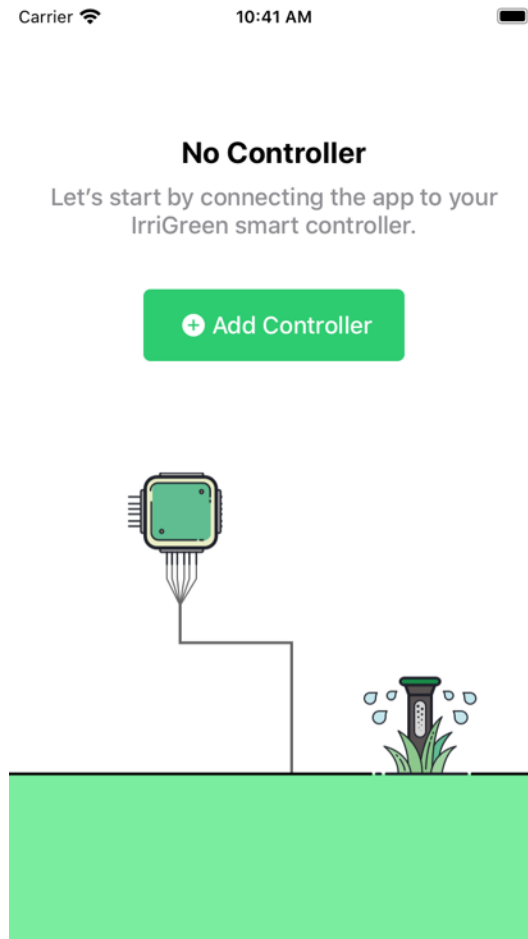

Connect with IOS App

1. Start IG2 App
2. Click “Allow In Use Location”
3. Select “Allow While Using App”

Connecting with IOS App

4. Click “Add Controller”

5. Scan Barcode on Controller

Connecting with IOS App

6. App Will Start Connecting

Carrier  10:57 AM 

Processing...

Extracting controller information
to proceed.

7. Connected Screen

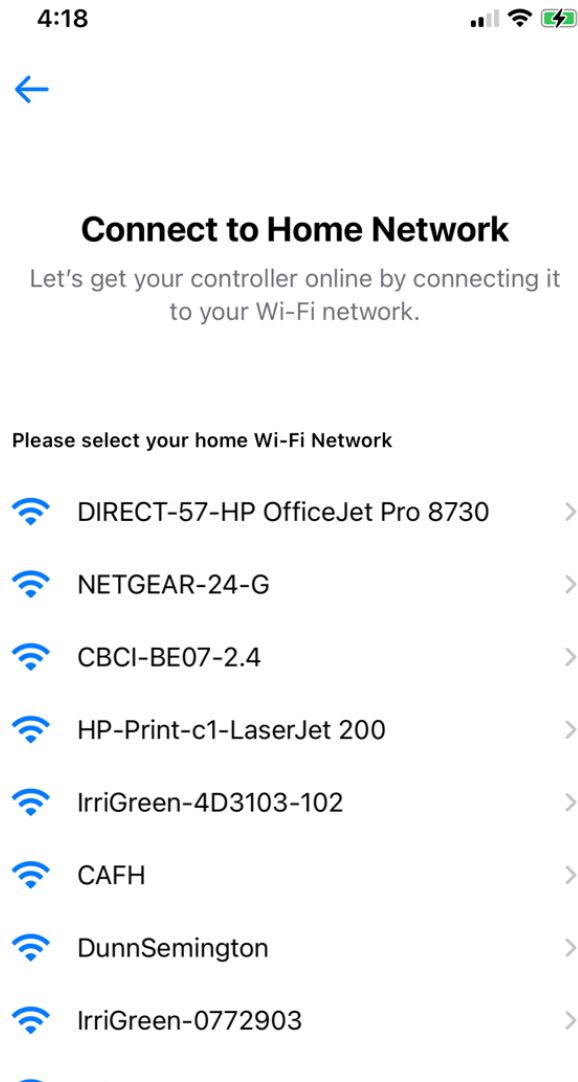

Carrier  10:57 AM 

Connected!

You've successfully made a connection
to your smart controller.

App will prompt rollover to 2.4 GHz Wi-Fi

NOTE: When trying to roll system onto home Wi-Fi, **turn off VPN, if any.** Turn VPN back on when system is connected to Wi-Fi

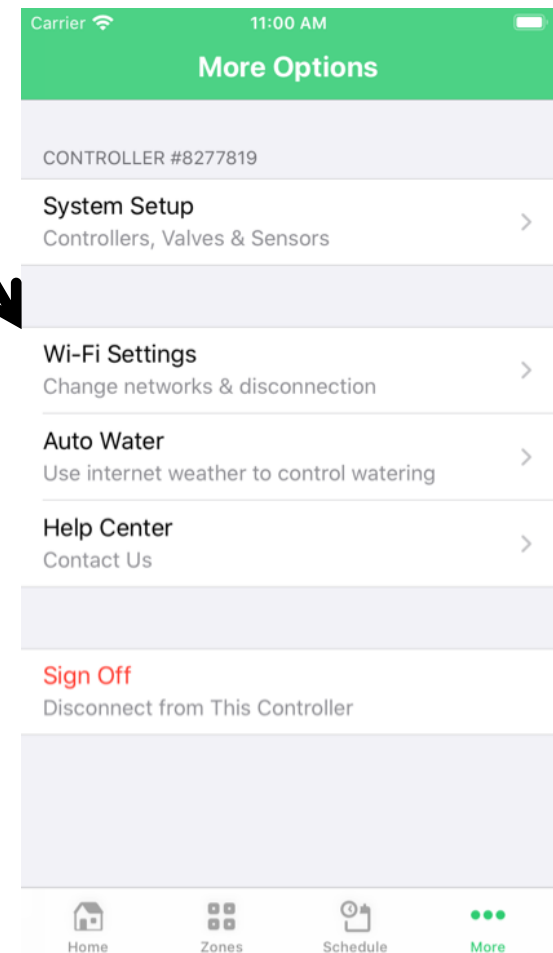

Manual Wi-Fi Rollover

Go to Dashboard
Click “More”

Click Wi-Fi
Settings

Follow Wizard, then
connect mobile device to
the home network

App Dashboard has Connection Status Widget

8. Dashboard Will Appear

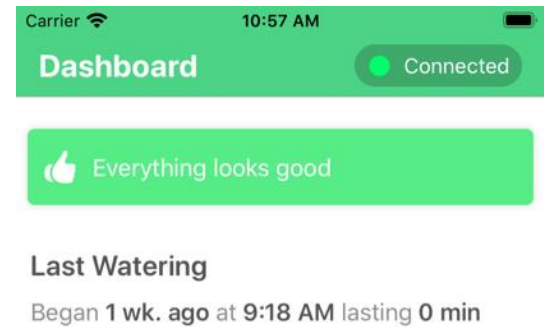

Wi-Fi/Cell Connection Status, should be Green.

Yellow is unstable connection.

Red is no connection, move back in Wi-Fi range and Click to reconnect.

NOTE: App will switch to cell network if controller is rolled over and there is a strong cell signal

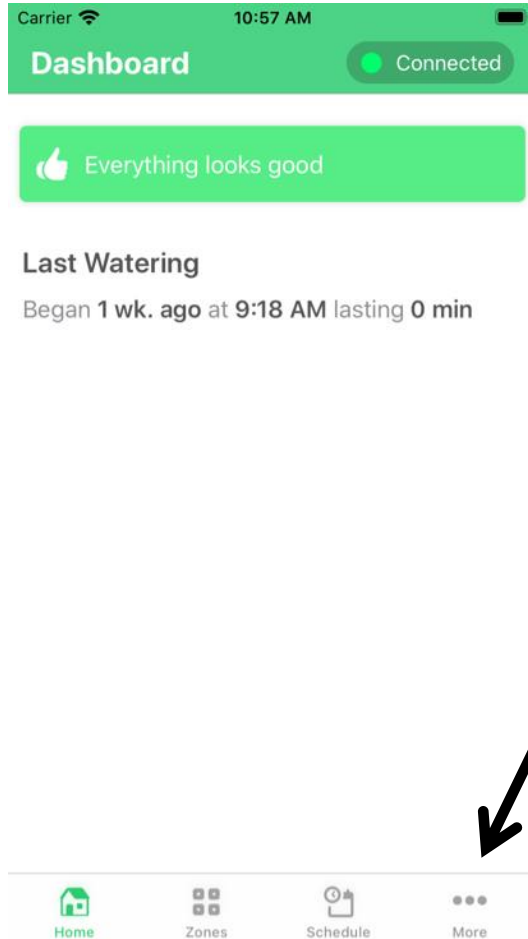

App/Dashboard Menu appears on bottom of screen

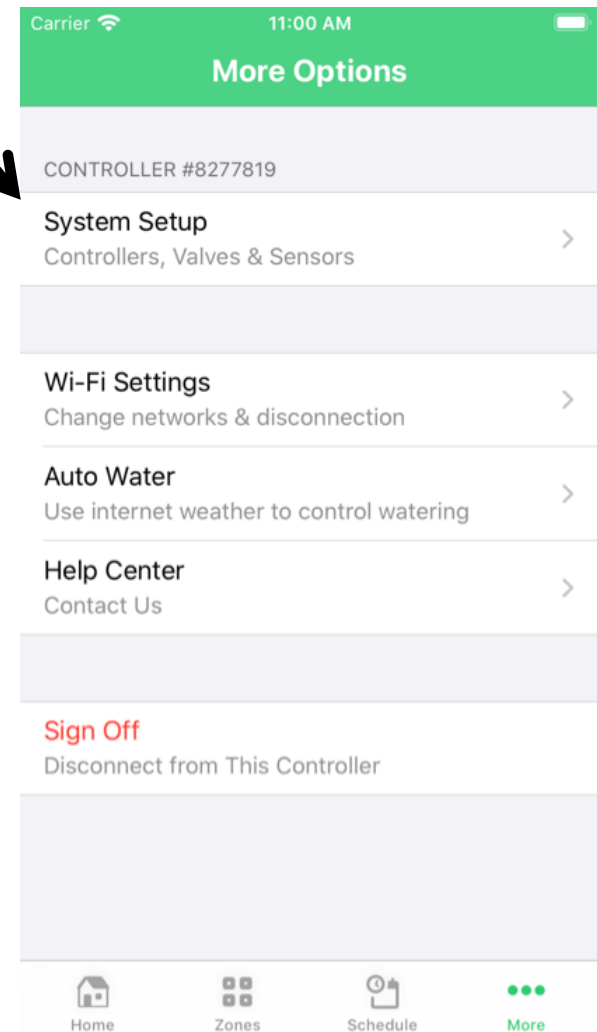

IOS System Settings

Go to System Setup Page to Verify Settings

Click “More”

Click “System Setup”

IOS System Settings: Optional Flow Sensor

System Setup Page
Click Flow Meter

Sens2

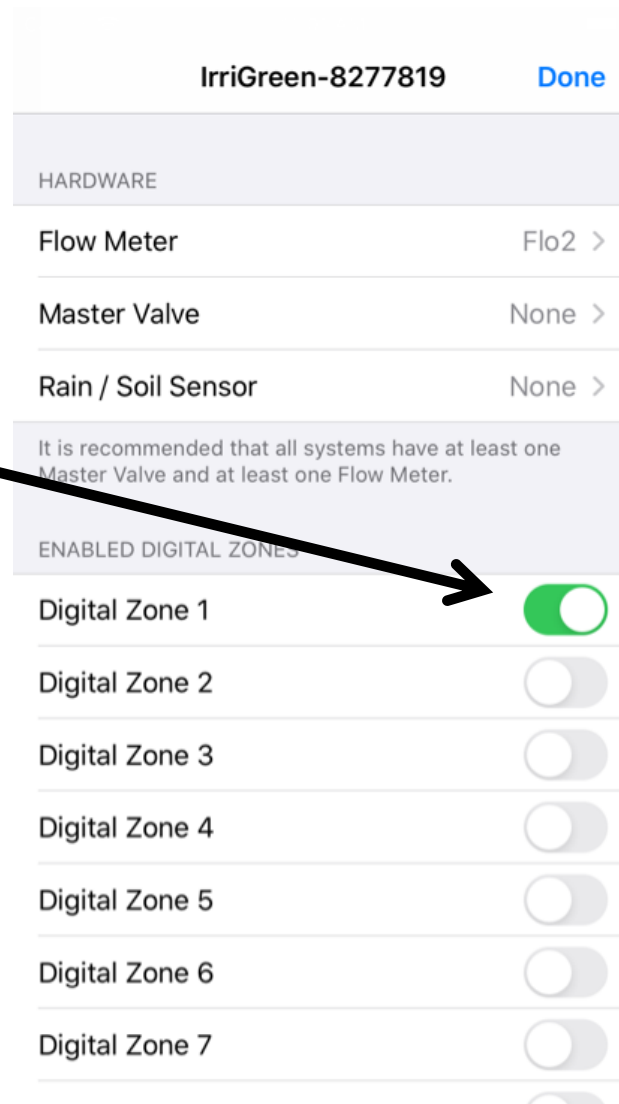

Please select nodes where a rain or soil sensor is connected

IOS System Settings: Digital Zones are Pre-enabled at the Factory

To enable Digital Sprinkler Zones (if needed):

1. Go to Setup Page
2. Click Digital Zone Button to green On position

There are 16 Digital Zones available, as two separate sequences of eight.

Zones may be divided up between the two separate sequences of eight (requires second controller cable).

Example:

Seven Digital Zones could be:

Digital Zones 1-7

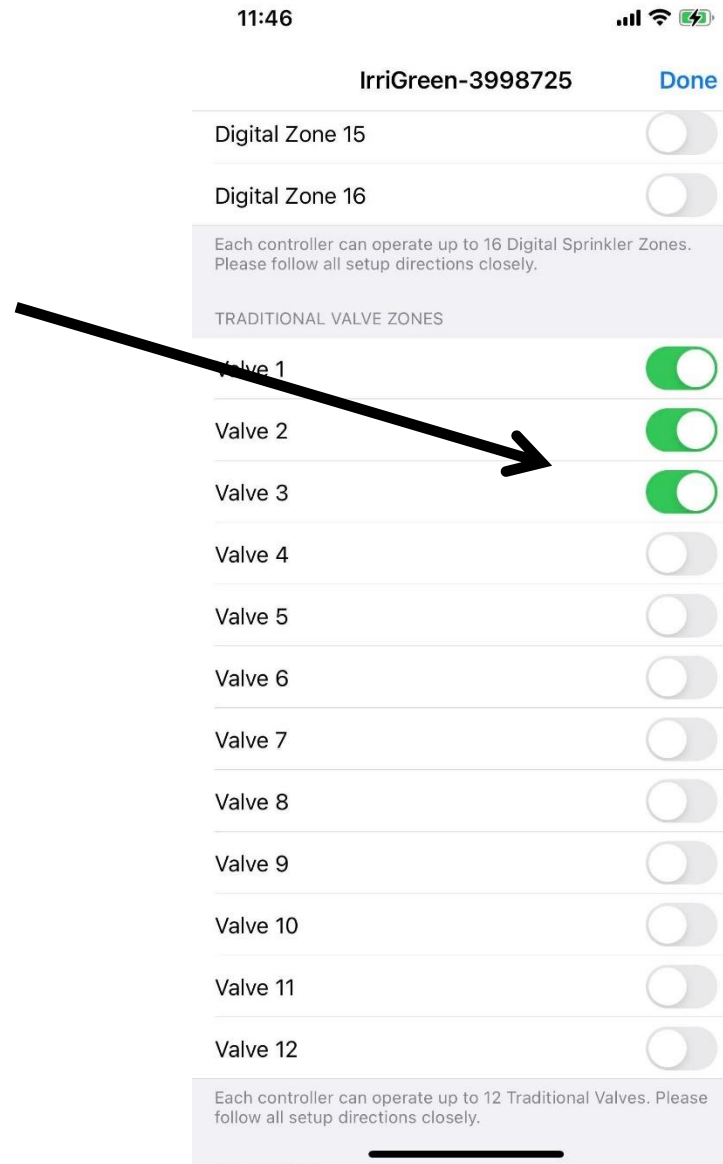

OR

Digital Zones 1-4 and Digital Zones 9-11₁₂

IOS System Settings: Enable Valve Zones

1. Go to Setup Page
2. Scroll to Valve Zones
3. Click Valve Zone Button to green "On" position

Wire valves to Valve 1, Valve2, etc. terminals

Sprinklers are Pre-numbered for each Zone

Locate sprinklers in the order you want them to run

Plug all heads together and make sure they all run BEFORE Burying

*Head #1 runs first
Head #2 runs second
Head #3 runs third
Etc.

**Digital Sprinklers have Zone Numbers 1-16
assigned at the factory**

Zone Number on Sprinkler box

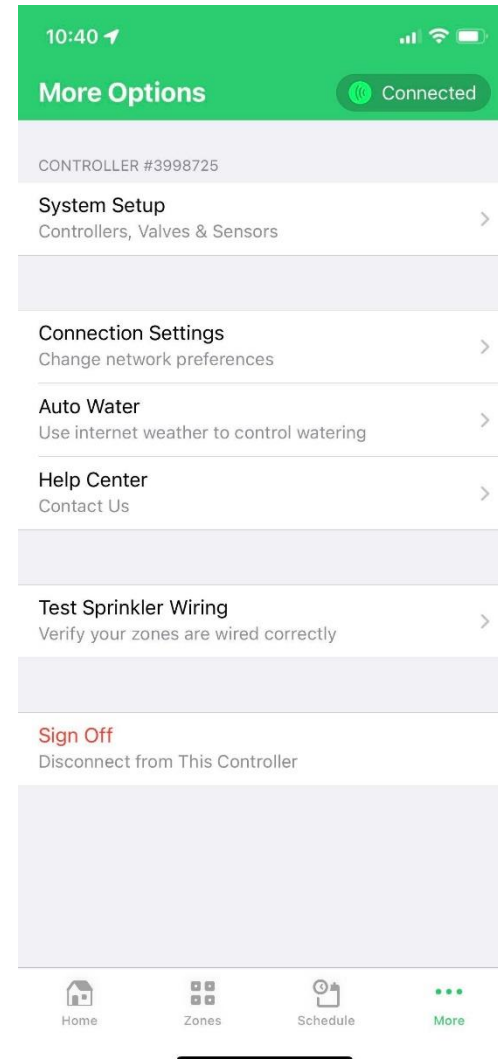

Zone Number on Sprinkler

Test Sprinkler Connections Before Burying Heads or Cables

“More” Screen

Click Test Sprinkler Wiring

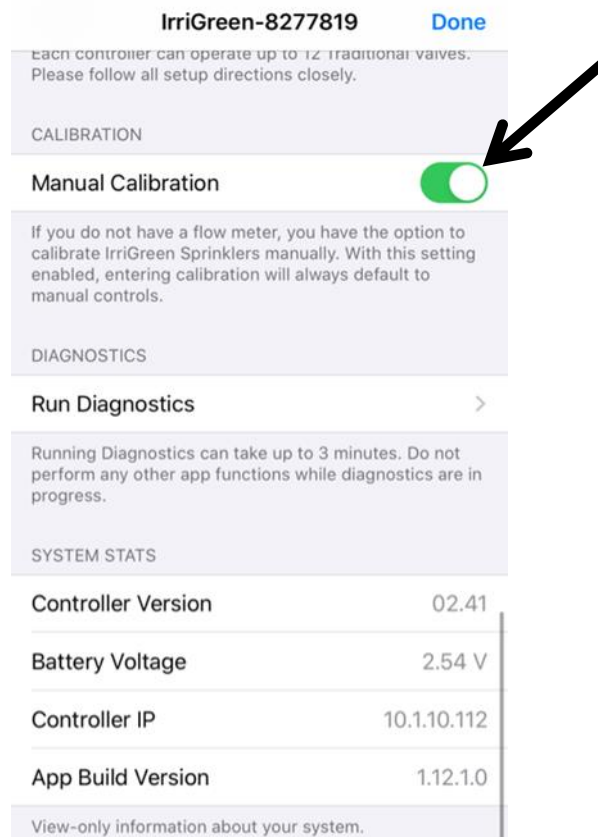

System will run a check on all sprinklers

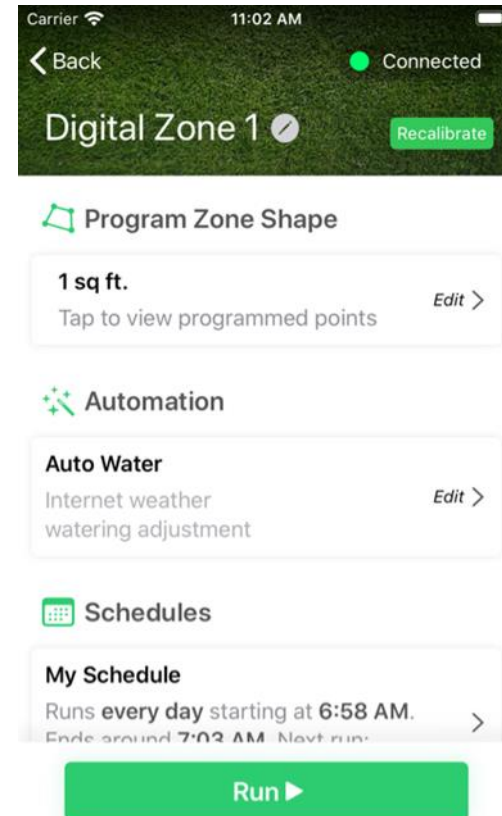

Zone Calibration, No Flow Sensor

Calibrate every digital zone before mapping

Verify “Manual Calibration” is enabled at Bottom of Setup screen

1. Click “Calibrate” on Digital Zone Screen

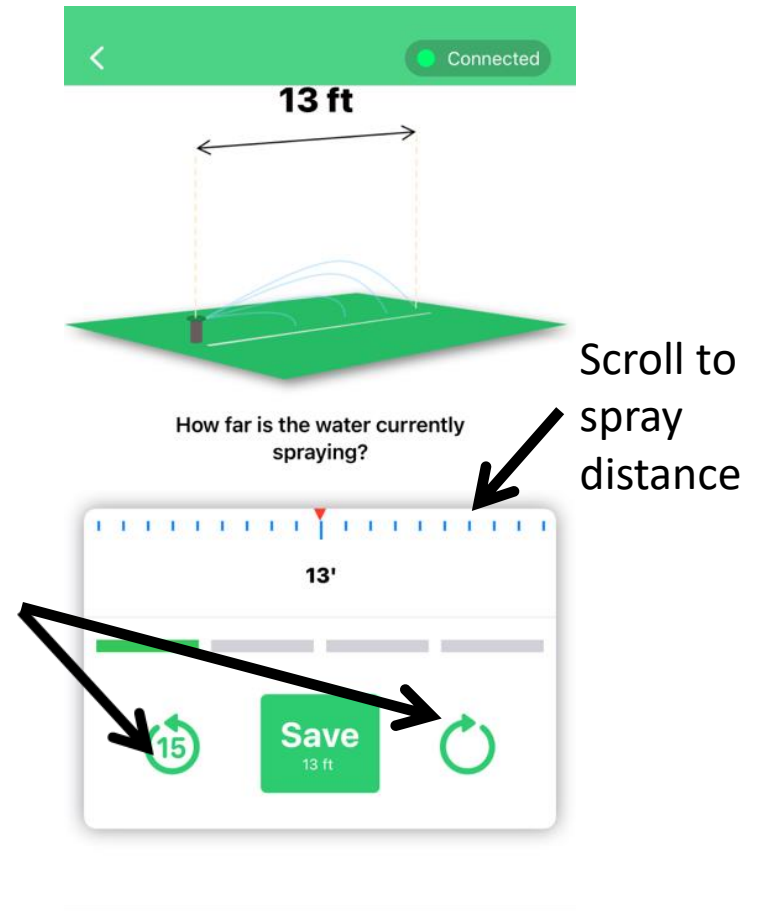

Manual Zone Calibration

Calibrate Every Digital Zone Before Mapping

2. Head will turn on, spray ~12'
3. Rotate head to spray in flat area
4. Measure spray distance
5. Enter distance on the screen
6. Click Save

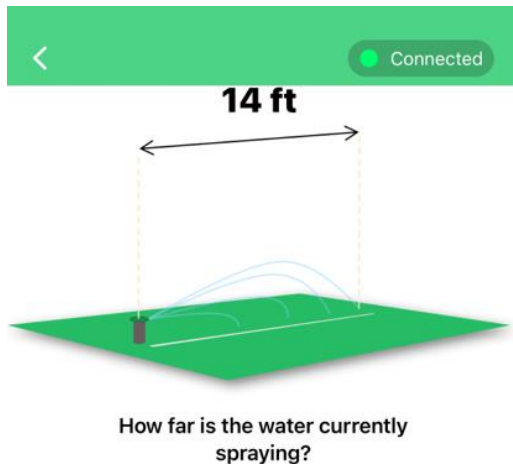

Use "Rotate " Controls so streams spray in flat, open area for accurate distance measurement

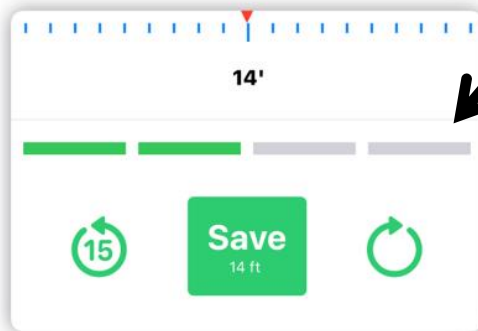

Zone Calibration

Calibrate Every Digital Zone Before Mapping

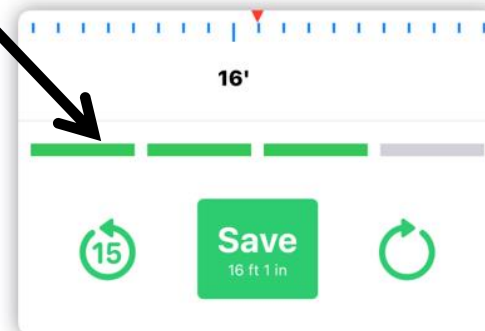

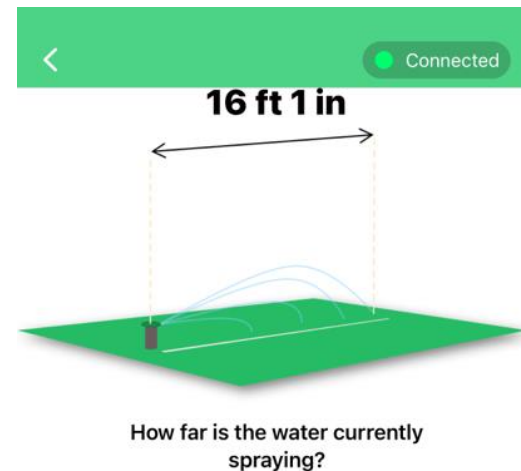

7. Head will now spray ~13'
Measure spray distance
Enter distance and click **Save**

Update distances at each step until all of the progress bars are green

8. Head will then spray ~15-25'
Measure spray distance
Enter distance and click **Save**

Zone Calibration Final Steps

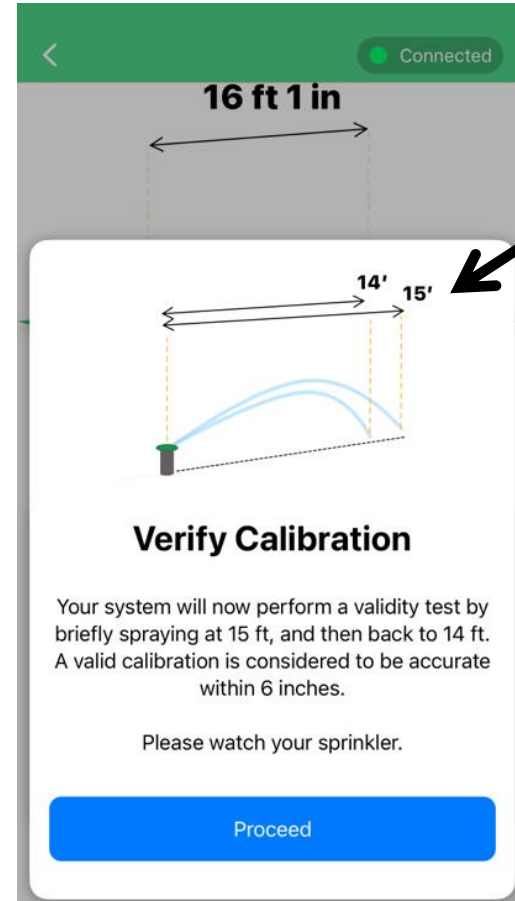

Calibrate Every Digital Zone Before Mapping

9. Head will then spray ~13'
Measure spray distance
Enter distance and click **Save**

Entering the fourth distance will turn all progress bars green

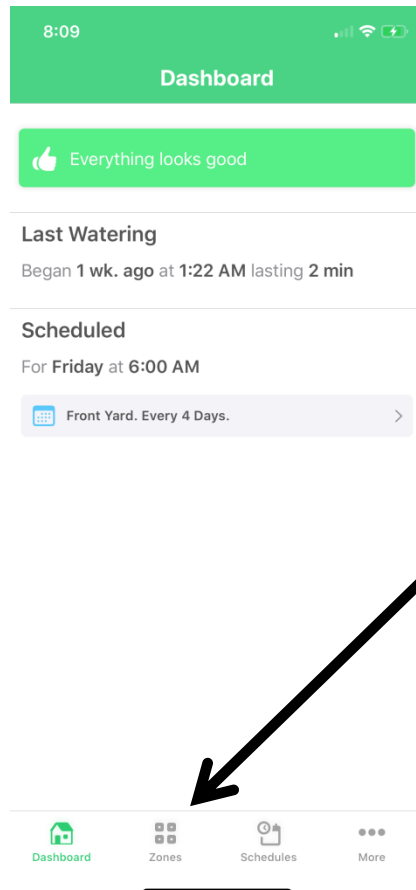

10. Watch sprinkler to verify Calibration
It will shut off, spray 15', and then 14'
Click **Proceed** to verify calibration
You are ready to map that zone

Calibration Verification:
Head will pop up and spray 15', then drop back to 14'

My Schedule

Runs every day starting at 6:58 AM.
Ends around 7:03 AM. Next run:

>

Run ▶

Head will pop up and
spray ~15'

Interactive Smart Irrigation Zone Design

**Scan QR Code below and
watch the video**

**Smart Irrigation Zone Design
Video - IOS**

Drop Head Between Two Points

Create 180 degree (or other) pattern

- Create the two points you want the head to drop down between
- Create a new point and place it within the red circle that appears when dragging points close to the head
- The head will drop down between the two points

Zone Map/Programming Rules

The zone startup point may be anywhere, BUT this first Point distance must be 10+ feet to fully pop up and seat the riser

- “Best practice” is to use minimal number of map points to create zone shape, then add points as needed to optimize tracking
- Set map points to track about 6” from zone edges; water will soak out to the edge
- Up to 50 map points are allowed per zone, system will not save over 50 points
- When zone is started up, it will spray at 15 feet, create the first point and place where you want the zone to start, must be over 10 feet

IOS Schedule Page for Days & Times

ABCD Schedules for Multiple Scheduling

8:03

Create Schedule

Start Time

6:00 AM

Cycle

Water on Even/Odd Days

Even Odd

Water on Individual Days

Water Every X Days

Digital Sprinklers

Zone 1

Water 0.25" inches

Valves

Save

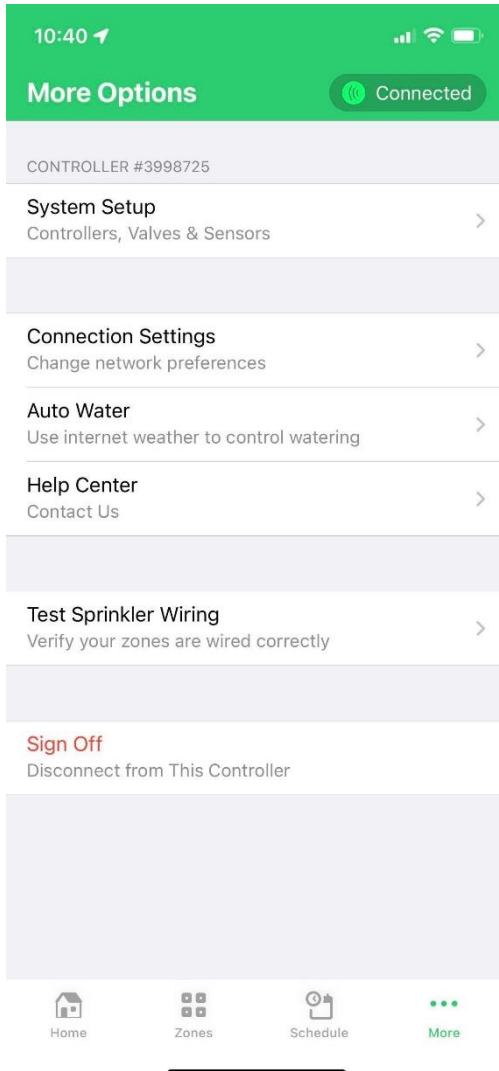

Start Time

Watering Days

Select Inches of water to apply.
(Should be a minimum of .25" so that enough water is applied per watering event to allow water to soak in between the streams)

Auto Water uses Internet Weather Data

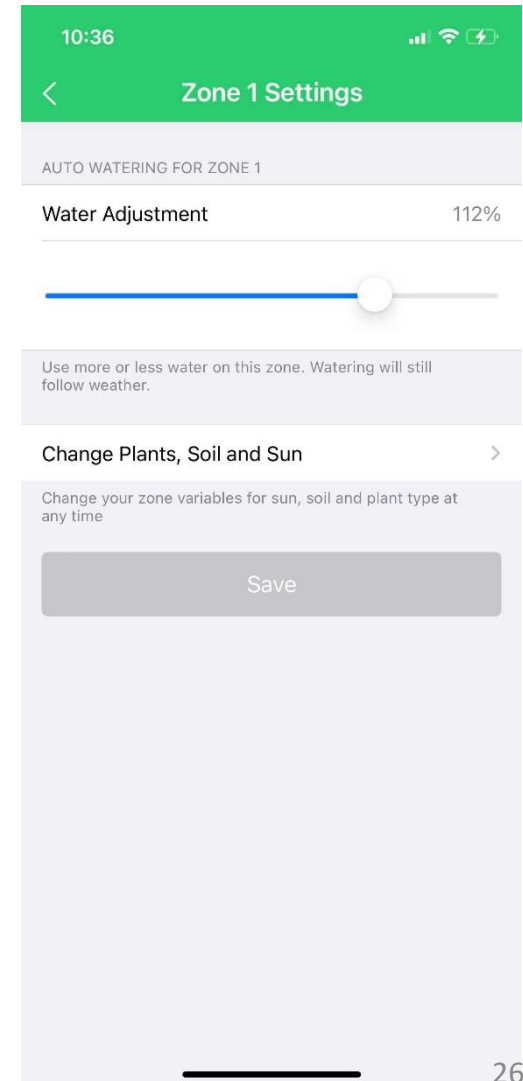

Set Percentage of Water You Want to Apply, per Zone

1. Create Schedule
2. Enable Auto Water
3. Set Percentage
4. Set per Zone on Zone Page

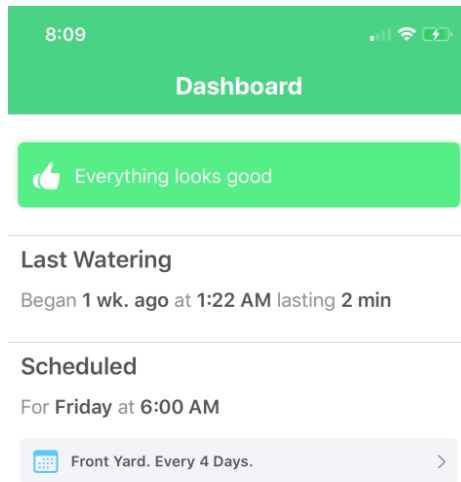

NOTE: There must be a watering schedule enabled for Auto Water to work; it will vary the watering amounts and times of all schedules to match the total weekly evapotranspiration (Eto) data for your location. It will skip days if needed.

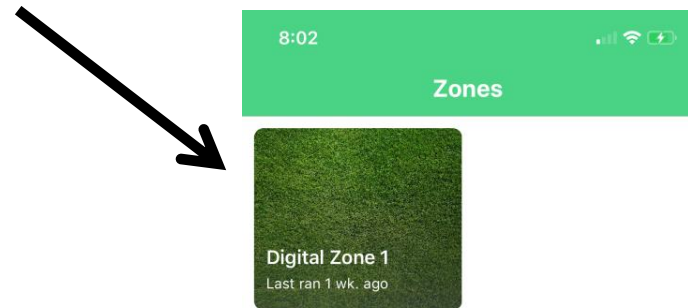

IOS Change Zone

Click Zones

Select Digital Zone

Name Zones Page

Add Zone pictures

Click Icon to name a Zone
and add a photo

Tap to Edit: Name Zone
Add Zone Picture

Optional Flow Sensor Zone Calibration

Calibrate Every Digital Zone Before Mapping

Click Calibrate Button

Takes about 4 minutes

Head sprays varying distances

 Program Zone Shape

Click Erase All Points

Phone Says “Searching for Device” Try Resetting Wi-Fi App Connection

**If you can't connect through home wi-fi, try
resetting the Wi-Fi connection**

Go to Home Page on app

Click "More" on lower right corner

Click "Disconnect from Controller"

Close Irrigreen app on your phone

Go to Phone settings, Turn Wi-Fi off

Press Green button on Controller, wait 30
seconds

(Controller will try to reconnect to your home
Wi-Fi network)

Check to see if Green LED is glowing and
blinking off momentarily, this indicates it is on
your home network

Go to Phone Settings, turn Wi-Fi on

Make sure phone is on your into Home
network

Start up app
